

Muscular System Unit

- Muscles turn chemical energy into kinetic energy or the energy of motion.

- Blood vessels are also woven into the muscles to bring fresh blood with sugar and oxygen and to remove waste.

- Which is voluntary and which involuntary?

- Upon stimulation by an action potential from your brain and nerves, skeletal muscles perform a coordinated contraction by shortening.

- Muscle can also be voluntary and involuntary.
 - Voluntary muscles you can control.
 - Involuntary muscles are ones that you can't control.

- Step 1:
 - 1) Please put on eyewear and gloves.
 - 2) Place chicken leg on dissection tray.

In smooth muscle tissue the contractile fibers are not highly ordered (non-striated) occurring in the gut and other internal organs and not under voluntary control.

Skeletal Muscle

Cardiac Muscle is involuntary, striated muscle that constitutes the main tissue of the wall of the heart.

(Skeletal muscles, striated, connect to your bones and allow you to perform a wide range of movements and functions. Skeletal muscles are voluntary are meaning you control how and when they work.)

- Review! The human body contains three types of muscular tissue.

- Skeletal Muscle
- Smooth Muscle
- Cardiac Muscle

Learn more about muscle tissue at...
http://www.bodanymuseum.ac.za/sci_edvgrade10/mammal/muscle.htm

- 3.) Move the legs manually
 - Flexion decreases the angle between two structures or joints as they bend or move closer together, whereas extension increases the angle between them as they straighten and move apart.

Interactive Slideshows

- Bones are held together by connective tissues.
 - Ligaments: Bones to bones
 - Tendons: Bones to muscles

- Please name the muscles labeled below?

A Quadriceps
B Hamstrings
C Calves

12

- Individual muscles can act only to shorten, and not to lengthen the distance between two attachment points. (Tendons)
 - They can only pull, they can't push.

- Match the correct Functions of the Muscular System to the picture.
 - Movement
 - Stability and Posture
 - Heat Production
 - Circulation
 - Aids in Digestion

- HELP IN DIGESTION: Smooth muscles like stomach and the intestines help the digestive system in the process of digestion.
 - They help move food through the system.

Large Intestines

Notes, Activities, Assessments, Games and more all built-in

- This is a thin casing of connective tissue that surrounds and holds every organ, blood vessel, bone, nerve fiber and muscle in place.

Fascia

19

- Name this muscle?

gluteus maximus

18

and easily identifiable muscles.

– We have 650 muscles and we focused on about 13.

Part 3: Muscular System: 4 Lessons of 50 Minutes and 10 Page Work Bundle, # of Muscles in the Human Body, How blood vessels are woven into muscles and why, Stimulation of Action Potential, Coordinated Shortening, Types of Muscles, Smooth Muscle, Cardiac Muscle, Skeletal Muscle, Functions of the Muscular System, Posture, Good and Bad Posture, Phone Use and Posture, Review of the Functions with Visuals, Voluntary and Involuntary Muscles, Pupil Dilation Activity, Sarcomere and How they Work, Muscle Fibers, Examples with bicep and triceps, Smooth Muscles, Peristalsis Activity, Common Muscles of the Human Body with Visuals, and animated .gifs, Students stand, sit, and make movements as each common muscle is described, Review of the Common Muscles of the Human Body, Visual Quiz of the Muscles, Box Game Review, Crossword Puzzle, Chicken Leg Dissections with Visuals and Step by Step Instructions, Dissection includes Flexion and Extension, Major Muscles, Alula, Bones, Fascia, Ligaments, Cartilage, of a Chicken Leg, Visual Review Wrap-Up of Chicken Leg, Full Unit Assessment, Answer Version to the Assessment so Student can Self Assess.

SlideSpark Science

MIDDLE-LEVEL EDUCATIONAL RESOURCES

Interactive slideshows provide the roadmap for an amazing learning experience for students in grades 5-9. A Detailed set of work bundles chronologically follow the digital learning, providing a clear and intuitive roadmap to understanding. As the teacher or student advances through a slideshow, exciting hands-on activities, fantastic visuals, fill-in notes, review opportunities, video links, assessments, and much more are strategically placed throughout. Interactive learning unfolds step by step and supported by the work bundle to reach all types of learners. Everything you need to run to an amazing learning experience is provided in this one-of-a-kind science curriculum.

Each unit in the curriculum is designed to help teachers deliver the best possible learning experience for their students. Our interactive science slideshows are filled with questions and answers, important fill-in notes, hands-on activities, projects, games, built-in quizzes, and end of the unit assessment pieces. Students follow along with a work bundle that documents the entire learning experience for a fantastic review and assessment piece.

- Blood vessels are also woven into the muscles to... bring fresh blood with sugar and oxygen and to remove waste.

Structure of a Skeletal Muscle

Copyright © 2024 SlideSpark, LLC

Part 3: Muscular System

Names: _____

How many muscles are in the human body? _____

_____ vessels are also woven into the muscles to... bring fresh blood with _____ and _____ and to remove _____.

Upon stimulation by an action potential from your _____ and _____, skeletal muscles perform a coordinated _____ by _____.

The human body contains 3 types of muscular tissue.

- _____ Muscle
- _____ Muscle
- _____ Muscle

Red Slide Notes: Help students record important information in a fun and easy-to-understand way. Designed red-colored slides contain a few pieces of crucial information that students must record into their work bundle to complete the notes. Students will use these important notes throughout the work bundle.

The set-up of the slideshows are designed to make learning fun and interactive for students. With a mix of questions and answers, teachers can use these slides to get their students thinking and actively participating in their education. Plus, the answers are always revealed on the next slide, providing students with immediate feedback and helping teachers assess their understanding.

Next Slide

Work Bundle

Lesson Planning

Daily lessons space exciting hands-on activities, red slide notes, video and academic links, projects, simulations, readings, built-in quizzes, and review opportunities throughout the slideshows. A typical day may have many different learning styles being targeted. Daily lesson planning becomes advancing through the slideshow roadmap the night before. Each lesson is roughly 50 minutes, but sometimes things can speed up or slow down. The best strategy is just to go at your classes own pace. The work bundle chronologically follows the interactive slideshow and you can always spend extra time assessing the quality of the writing within. If you don't quite finish a lesson, you can always pick it up the next day where you left off. The only real trick in timing is not starting a larger activity if you don't have the available time to complete. The slideshows have been designed to be a low stress, go at your classes own pace experience. Most activities are designed to be cost effective, using general materials that can be gathered from your local stores.

Follow Along Work Bundle

Each science unit comes with several work bundles. The bundles should be printed before the unit begins and distributed to the students on the first day of the unit. The work bundles will be due shortly after the completion of the unit. The work bundle will become a resource for the review games, crossword puzzles, and will be collected for assessment. The work bundle follows the entire learning experience and will be used every day. They are chronological to the lessons and provide places to record fill-in notes, answer questions, collect data, graph and much more. An answer version is provided that can be distributed to your support professionals. A digital version of the work bundle and some writable .pdf versions are provided if you want to go paperless. These work bundles are perfect for students looking for an easy and organized way to track their progress and stay on top of their studies.

Page 2, Lesson 1: Skeletal System

What index indicates up to the number 50? _____

_____ means one divided into the muscles to _____ being mean divided into _____ and _____ used to help _____

upper extremities to the action gathering body part _____ and _____ the muscles perform to coordinate _____ by _____

The human body contains 2 types of muscular tissue.

- _____
- _____
- _____

They provide the force by using energy to contract. Muscles are the main source of _____ for the body. They _____ groups of food into _____ and _____.

_____ skeletal muscles provide human movement. Some _____ muscles are used and they receive _____.

_____ Digestion takes place in a set of organs produced by the muscular system. _____ is _____.

_____ Contracted muscles provide the force for contraction of the _____ body. The kidneys filter in _____ and remove a soluble waste, _____.

_____ Smooth muscles line stomach and the intestines in the digestive system in the process of digestion.

They, _____ food through the system.

Describe the difference between voluntary and involuntary muscles: • You must use specific muscle examples.

1.	a	a
2.	b	b
3.	c	c
4.	d	d

5. Please label some of the muscles **below**

The diagram shows a lateral view of a right hand and forearm. Labels are placed as follows: 'a' points to the trapezoid carpal bone; 'b' points to the trapezoid carpal bone; 'c' points to the trapezoid carpal bone; 'd' points to the trapezoid carpal bone.

Page 1 Find the area of the shaded region. The figure shows a circle with a radius of 10 cm. A sector of the circle is shaded. The central angle of the sector is 60°. Page 2 Find the area of the shaded region. The figure shows a circle with a radius of 10 cm. A sector of the circle is shaded. The central angle of the sector is 60°.	Page 3 Find the area of the shaded region. The figure shows a circle with a radius of 10 cm. A sector of the circle is shaded. The central angle of the sector is 60°. Page 4 Find the area of the shaded region. The figure shows a circle with a radius of 10 cm. A sector of the circle is shaded. The central angle of the sector is 60°.	Page 5 Find the area of the shaded region. The figure shows a circle with a radius of 10 cm. A sector of the circle is shaded. The central angle of the sector is 60°. Page 6 Find the area of the shaded region. The figure shows a circle with a radius of 10 cm. A sector of the circle is shaded. The central angle of the sector is 60°.
---	---	---

How many muscles are in the human body? **650 muscles**

Flow: vessels are also driven into the muscles by going back through the **capillaries** and out to remove **oxygen**

Upon stimulation by an action potential from your **brain** and **nerve**, skeletal muscles are coordinated **contraction** by **phenomenon**.

The human body contains 2 types of muscular tissue: **skeletal muscle**

- CANCER** - Contact medicine provides the **fuel** for expansion of cancerous **cells**.
- Leukemia** - This steals blood in **marrow** and nutrients available to every **cell** of the **body**.
- AIDS** in **leukemia** - Leukin **immune** like **stomach** and **intestines** help the **digest** system in the **process** of **digestion**.
- They help **move** food through the **system**.

Voluntary muscles are those that are under conscious control. They contract on purpose. **Involuntary muscles** contract on their own without conscious control. Examples of involuntary muscles: pupil dilation, intestines, stomach, diaphragm, etc. Examples of voluntary muscles: calf, bicep, tongue, etc.

1-20 in 3 pt, 20-25 in 3 pt

20-25 in 3 pt Bonus 1 pt

(Secretly, write your own guess for 7 pt)

Final Question = 3 pt bonus

Score: _____ / 100

Review Game / Assessments

This unit concludes with a review quiz. Answers are provided in slideshow form so students can self assess. A blank template sheet is provided in the work bundle. Students can benefit from working together in small table groups with quiet communication. You can decide if you want to allow the use of work bundles or not. These are a nice review opportunity and get the students looking through their work bundles for the answers.

Part 3 Review Game Name: _____

1-20 = 5 pts. **Part 3 Lesson 4**

Final Question: Wager _____ / 5. Answer: **Hamstrings**

Copyright © 2014 Slidespark LLC

- How many muscles are in the human body?

– A.) 650,000,000
– B.) 6,500
– C.) 650
– D.) 65
– E.) 6.5
– F.) Nobody Knows.

Copyright © 2024 SlideSpark LLC

- Blood vessels are woven into the muscles to... bring fresh blood with sugar and oxygen and to remove waste

Structure of a Skeletal Muscle

Copyright © 2024 SlideSpark LLC

- Upon stimulation by an action potential from your brain and nerves, skeletal muscles perform a coordinated contraction by shortening.

Copyright © 2024 SlideSpark LLC

- Name the 3 types of muscular tissue shown below?

A Smooth

B Skeletal

C Cardiac

Copyright © 2024 SlideSpark LLC

Which is not a function of the Muscular System

- A.) Allows Movement
- B.) Gives us Stability and Posture
- C.) Heat Production
- D.) Digests Food
- E.) Circulation of blood

– Smooth Muscles, They help move food through the system.

5

- Muscle Fiber: Long fibers that run parallel to each other and are held together by connective tissue.

6

Copyright © 2024 SlideSpark LLC

- Individual muscles can act only to pull the distance between two attachment points. (Tendons)

– They can only pull, they can't push.

7

Copyright © 2024 SlideSpark LLC

- Which muscle contracts, and which relaxes when you straighten your arm?
- The contraction of the triceps and relaxation of the biceps produces the effect of straightening the arm.

Copyright © 2024 SlideSpark LLC

- Which one is the general shape of skeletal muscles?

9

- What muscle is likely strained?

Hamstrings

Copyright © 2024 SlideSpark LLC

- Please name these two muscles.

10

Pectoralis

A

Abdominals

B

- Please name the muscles described below?

11

- Please name the muscles labeled below?

12

A Quadriceps

B Hamstrings

C Calves

- True or False? This is muscle?

13

True! It's Smooth Muscle

- Which is skeletal muscle, smooth muscle, and cardiac muscle?

14

- The two muscles shown below are different because one is cardiac muscle, and one is skeletal muscle. How else are they different?

Voluntary Muscle

Involuntary Muscle

15

- This is a thin casing of connective tissue that surrounds and holds every organ, blood vessel, bone, nerve fiber and muscle in place.

Fascia

19

- Name these muscles?

Trapezius

- Name these muscles?

Latissimus dorsi
"Lats"

- Name this muscle?

gluteus maximus

- This is the basic contractile unit of muscle fiber.
 - It is composed of two main protein filaments—actin and myosin—which are the active structures responsible for muscular contraction.

20

- A.) Myotendril
- B.) Sarcomere
- C.) Stinge Tip
- D.) Elastomere
- E.) Stretchitdosis

Activities / Labs

Our science activities are designed to help students explore and understand complex scientific concepts in an engaging and interactive way. Each science unit includes several hands-on activities that encourage students to collect data and think critically about the world around them. Our easy-to-follow slideshow provides detailed visuals, simple materials, and clear directions, making it easy for both students and teachers to navigate the activities.

- Lab Activity! Chicken Leg Dissection.

- Step 1:
- 1) Please put on eyewear and gloves.
- 2) Place chicken leg on dissection tray.

- 3.) Move the legs manually

- Flexion decreases the angle between two structures or joints as they bend or move closer together, whereas extension increases the angle between them as they straighten and move apart.

Built-in Quizzes

Each unit contains several built-in quizzes that students answer in their work bundle. With the question revealed before the answer, the teacher can easily call on individual students or table groups to respond. These quizzes provide an effective and efficient way for teachers to assess student learning.

- Quiz Wiz! Name that muscle on Stallone
- Music for quiz (1-10 + bonus)
- <http://www.youtube.com/watch?v=QEiqPh4SEmU>

Quiz Wiz! Name that muscle on Stallone.		
1)	2)	3)
4)	5)	6)
7)	8)	9)
*11)		

Please label some of the muscles below!

Quiz in Work Bundle

Built-in Video Links

Our science education program is designed with the modern, multimedia learner in mind, and our video links are a perfect complement to our educational materials. These short clips are embedded into the slideshow at just the right places for a fantastic review. Whether you're studying biology, chemistry or physics, our video links are an excellent way to reinforce your learning.

- Video! Muscular and Skeletal System working together.

- Muscular System Game.

– Note: Some questions on the game are not from our list but we can use the hints.
– http://www.bbc.co.uk/science/humanbody/body/index_interactivebody.shtml

Games and Review

Games are a fantastic way for students to learn scientific concepts while having fun. We incorporate a variety of games into our curriculum, including interactive quizzes and puzzles that challenge students to think critically about the material. Our Hidden Box Games are a particularly popular feature, which conclude each unit by revealing a picture related to the topic. Students try to guess what the picture might be, making learning an engaging experience.

- Muscles turn chemical energy into kinetic energy or the energy of motion.

"I eat mice to give me the chemical energy so I can flap my wings (Kinetic)."

into kinetic

The Owl - Each Part of the slideshow has a small clipart Owl hiding somewhere in a slide. The owl is incredibly small and blended into just the right slide. If a student spots the "Owl" they can raise their hand high into the air. When you call upon the student they can say "Owl" and be the student who spotted the Owl. Each PowerPoint Review game also has an owl hiding in it worth one point. Remind the students that they secretly write the word "owl" rather than yell it out during the review games. The Owl search is not included in every lesson. A slide at the beginning of the lesson will alert the students that today is an "Owl" day. Everything arrives editable so delete if you wish. You will find that some students will become the expert owl hunters in the group.

Google Classroom Compatible

Our digital learning programs are designed for students to learn science in a flexible and engaging environment. Our Google Classroom-compatible units provide a seamless learning experience whether your students are in the classroom or learning from home. Our step-by-step slideshows and student work bundles ensure that students can complete their work independently. The PowerPoint Slideshows and step-by-step work bundles can easily be loaded to your Google Drive and posted in your Google Classroom. These are great for daily lessons, students who need additional time, and for a student who was absent and looking to catch up in their work bundle.

Built-in Questions and Assessments

Many slides will have relevant terms covered with a box. When advancing through the slideshow an outline around the box will glow with a bright color. The next slide will make the box disappear. These slides allow the teacher to call upon students or table groups / check for understanding before advancing. The team at SlideSpark has found that using this technique helps to keep the students focused. Constantly recalling and reviewing information learned is necessary when moving through a large unit. The slideshows don't just give everything away for free. Students should be able to demonstrate knowledge before moving on. Some slides have full questions instead of just covered terms. In these slides, the teacher should encourage small group work. The teacher can then call upon one or two groups to share before advancing the slide. The next slide will always reveal the correct answer.

- Which one is the general shape of skeletal muscles?

Answer is...

- Which one is the general shape of skeletal muscles?

Answer is...

Human Body Systems and Health Topics Units

Human Body Systems and Health Topics Unit

Human Body Systems and Health Topics Unit
85 Lessons and 11 Parts. (6th- 8th Medium Difficulty).

Part 1 is about Levels of Biological Organization and has 5 Lessons and 11 Page Work Bundle. Part 2 is about the Skeletal System and has 7 Lessons and 13 Page Work Bundle. Part 3 is the Muscular System and contains 4 Lessons and 10 Page Work Bundle. Part 4 about Health and Nutrition and has 12 Lessons and 25 Page Work Bundle. Part 5 is the Digestive System and has 8 Lessons and 15 Page Work Bundle. Part 6 is the Circulatory and Lymphatic System and has 8 Lessons and 15 Page Work Bundle. Part 7 is the Respiratory System and has 14 Lessons and 20 Page Work Bundle. Part 8 is about the Excretory System and has 4 Lessons and 9 Page Bundle. Part 9 is the Nervous System and has a 13 Lessons and 21 Page Work Bundle. Part 10 is the Endocrine and Human Reproductive System and has 11 Lessons and 19 Page Work Bundle. Part 11 is about the Human Immune System and is 4 Lessons and 10 Page Work Bundle.

Games, and more all built-in**

With Follow Along Work Bundles

186 Pages of Work Bundle

Human Body Systems Unit Part 1 Download : 5 Lessons of 50 Minutes and 11 Page Follow Along Work Bundle, For fun Quiz to see if student can name some Human Organs, Answers to the Quiz, Description of Anatomy, Introduction to Concept Form Follows Function, Describe how a classroom tool demonstrates Form Follow Function Activity, Description of Physiology, History of Anatomy, Body Part Name Game, Levels of Biological Organization, Cellular Organelle, Cell, Tissue, Organ, Organ System, Individual, Looking at Cheek and Onion Cells Under the Microscope, Differences between Plant and Animal Cells, Multi-cellular vs. Unicellular, Cells as the Unit of Structure of Function, Different Types of Cells in the Human Body, Tissues in the Human Body, Identifying Some Common Organs in the Human Body Visual Diagram, Organ Systems in the Human Body, Visual Quiz that Names a Level of Biological Organization, Answers to Quiz, Homeostasis, Homeostasis Activity with Pulse and Stand in Place Exercise, Box Game Review, Crossword Puzzle, End Unit Assessment

Part 1: Levels of Biological Organization

Part 1 Lesson 1 Intro Structure Function

Part 1 Lesson 2 Levels and Cells

Part 1 Lesson 3 Cells and Tissues

Part 1 Lesson 4 Organ Homeostasis

Part 1 Lesson 5 Wrap Up Quiz

Part 1 Lesson 6 Quiz Answers

Part 1 Levels of Biological Organization Name: _____

Part 1 Review:

Working in small groups, Name the Organ of the human body and the system it belongs to if you know it. Let's see what you already know. (For fun!)

1) LIVER	2) STOMACH	3) BLOOD VESSELS	4) BRAIN
5) HEART	6) PANCREAS	7) KIDNEY	8) LUNGS
9) BLADDER	10) SPLEEN	11) GALL BLADDER	12) RECTUM
13) NADDER	14) ESOPHAGUS	15) TESTICLE	16) EAR
17) THYROID	18) UTERUS	19) ADRENAL	20) TONGUE

Source: www.kids-science.com

Anatomy: the science of the **shape** and **structure** of organisms.

(III) **Form Follows Function:** Parts of the body are shaped to perform a particular job.

- Students will pick an object with eyes closed.
- Make a quick sketch below.

Form Follows Function

A paper clip hold sheets of paper together, usually made of steel wire bent to a looped shape. The paperclip utilizes torsion and elasticity in the wire, and friction between wire and paper to hold paper together. A simple bending of wire creates a nice place to slide and hold paper. A simple example of Form Follows Function

Part 2: Skeletal System

Part 3: Muscular System: 4 Lessons of 50 Minutes and 10 Page Work Bundle, # of Muscles in the Human Body, How blood vessels are woven into muscles and why, Stimulation of Action Potential, Coordinated Shortening, Types of Muscles, Smooth Muscle, Cardiac Muscle, Skeletal Muscle, Functions of the Muscular System, Posture, Good and Bad Posture, Phone Use and Posture, Review of the Functions with Visuals, Voluntary and Involuntary Muscles, Pupil Dilation Activity, Sarcomere and How they Work, Muscle Fibers, Examples with bicep and triceps, Smooth Muscles, Peristalsis Activity, Common Muscles of the Human Body with Visuals, and animated .gifs, Students stand, sit, and make movements as each common muscle is described, Review of the Common Muscles of the Human Body, Visual Quiz of the Muscles, Box Game Review, Crossword Puzzle, Chicken Leg Dissections with Visuals and Step by Step Instructions, Dissection includes Flexion and Extension, Major Muscles, Alula, Bones, Fascia, Ligaments, Cartilage, of a Chicken Leg, Visual Review Wrap-Up of Chicken Leg, Full Unit Assessment, Answer Version to the Assessment so Student can Self Assess.

Part 3: Muscular System

Part 3 Lesson 1 Types of Muscles

Part 3 Lesson 2 Muscles Human Body

Part 3 Lesson 3 Chicken Leg Dissection

Part 3 Lesson 4 Review Game

Part 3 Lesson 5 Review Game Answers

Part 3 Work Bundle Answers

Part 3 Work Bundle Print Notes

Part 3 Work Bundle Print

Part 4: Health and Nutrition: 12 Lessons of about 50 minutes and 25 Page Follow Along Work Bundle, CHNOPS/SPONCH biologically important elements, Carbon and Organ Chemistry, % of SPONCH Elements in Living Things, Graphing this %, CaFé, Calcium, Iron, Organic Building Blocks, Carbohydrates, Lipids, Proteins, Nucleic Acids, Carbohydrates, Monosaccharide, Disaccharide, Polysaccharide, Sugars associated with each, Activity with Saltines and Iodine, Advantages and Disadvantages of Simple and Complex Sugars, Glycogen, Fiber, Soluble and Insoluble Fiber, Understanding Nutrition Labels, Protein, Amino Acids, Foods High in Protein, Four Important Functions of Proteins, Hormones, Lipids, Structure and Function of Lipids, Coronary Artery Disease Demonstration, Hormones, Some examples of common Hormones, Steroids, Anabolic Steroids, Some Dangers Associated with to use of Anabolic Steroids, Types of Fat, Unsaturated Fat, Saturated Fats, Trans fatty Acid, Structure of these Fats, Healthy and Unhealthy Fats, Nutrition Label and Fats, Visual Quiz of Carbohydrates, Lipids, and Proteins, Answers to Quiz so Students can Self-Assess, Box Game Review, MyPlate, Making a Meal Activity, Examples of Healthy Eating vs. Unhealthy Meal Choices, Processed and Unprocessed Foods, Jell-O and Pineapple Juice Optional Activity, Twinkie Dissection, Students get a Twinkie and then learn about all of the Ingredients inside, Deciding or Not to eat the Twinkie, Obesity, Diabetes, Dangers Associated with Obesity, Factors that can control Obesity, Why Fast Food Sells, Visual Quiz of Famous People in History vs. Food Mascots, Box Game Review, Ways to Get Control of your Weight, Healthy Eating, Factory Farming, Positives and Negatives of Factory Farming, Eating Disorders, Anorexia, Some Dangers Associated with Anorexia, Bulimia nervosa, How to be Supportive, Crossword Puzzle, Full Unit Assessment with Answers so Students can Self-Assess

Part 4 Lesson 1 SPONCH molecules

Part 4 Lesson 2 Carbs Proteins

Part 4 Lesson 3 Lipids Steroids

Part 4 Lesson 4 Types of Fat

Part 4 Lesson 5 Quiz and Review

Part 4 Lesson 6 Twinkie Lesson

Part 4 Lesson 7 Fast Food Obesity

Part 4 Lesson 8 Eating Healthy

Part 4 Lesson 9 Factory Farms

Part 4 Lesson 10 Eating Disorders

Part 4 Lesson 11 Review Game

Part 4 Lesson 12 Review Game Answers

Part 4 Work Bundle Answers

Part 4 Work Bundle Print with Notes

Part 4 Work Bundle Print

Part 4: Health and Nutrition

Part 5: Digestive System: 8 Lessons of 50 minutes, and 15 Page Follow Along Work Bundle, Review of Nutrients, Digestion, Saliva, Ptyalin, Chemical Digestion, Chewing Bread Activity, Mechanical Digestion, Synergism between Chemical and Mechanical Digestion, Taste Buds, Tasting Activity, Dentition, Dentition Imprint Activity, Swallowing, Bolus, Making a Bolus Activity, Safe Swallowing / Chewing, Pharynx, Epiglottis, Esophagus, Peristalsis, Stomach, Pyloric Valve, Step by Step Drawing of the Digestive System, Gastrointestinal Tract, Garden Hose Demo, Duodenum, Small Intestine, Surface Area and Digestion Demo, Pancreas, Pancreatic Juices, Enzymes, Liver, Gall Bladder, Vital Roles of the Liver, How Food gets Broken Down, Foods Macronutrients, Digestion Tic Tac Toe Review, Small Intestine, Villi, Villi and Surface Area, Ileocecal valve / sphincter, Appendix, Appendectomy, Cecum, Large Intestine, Visual Review of Organs, Digestive System Simulation, Students become an organ along the Digestive System and Digest Food (cereal in bags) by mechanical and chemical means, Visual Review, Box Games Review, Full Unit Assessment with Answer Version for Self-Assessment

Part 5: Digestive System

Part 5 Lesson 1 Nutrients Chew

Part 5 Lesson 2 Digestion

Part 5 Lesson 3 Digestive Organs

Part 5 Lesson 4 Intestines

Part 5 Lesson 5 Simulation Wrap Up

Part 5 Lesson 6 Review Game

Part 5 Lesson 7 Review Game Answers

Part 5 Work Bundle Answers

Dear Valued Educator,

Our fully editable .pptx and .doc resources are perfect for educators looking to bring enthusiasm and creativity to their lessons. We encourage you to make changes to fit your needs and style. As science educators, we're committed to providing students with the tools they need to succeed in the classroom and beyond. Each unit in the curriculum includes a range of resources that have been developed through extensive research and use in a busy classroom. Our teaching approach is designed to make science education engaging and exciting for learners of all ages. We offer a one-of-a-kind science curriculum that will challenge, inspire, and educate students to become tomorrow's scientists and leaders. Join us today and learn more about how our program can help you achieve your classroom goals.

With appreciation,

Support@SlideSpark.net

Thank you for your time and interest in our Science curriculum. We strive to provide students with engaging and informative lessons that will spark their curiosity and encourage scientific exploration. Should you have any questions or concerns, please do not hesitate to contact us. Thank you again for considering our curriculum, and we wish you all the best in your educational journey.

Sincerely,

Support@slidespark.net
